Art Unit: 2836

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's Attorney Barry L. Kelmachter on 9/12/2008.

The application has been amended as follows:

In Claim 8, lines 1-3 change,

"A device for protecting against arcing events solar array panels and control equipment supplying a main power bus," to

--- A device for protecting solar array panels and control equipment supplying a main power bus against arcing events,---.

2. The following is an examiner's statement of reasons for allowance: Regarding Claim 8, the closest prior art of record, Hoeber et al. (US 6,248,950) discloses a device (see Figures 1, 11-12) for protecting solar array panels 13 and control equipment supplying a main power bus (bus lines connected to loads) against arcing events, said control equipment comprising a regulator for controlling a solar array voltage including a power dump stage (see shunt segments 1 to 20) for shunting said solar array voltage as a function of a control signal (signal to the gate of shunt transistors), said device comprising:

an arc-quenching circuit comprising means (blocking diodes, RTV insulating materials, and circuitry to limit cell to cell voltage 50 V or less, see Abstract, Column 9, lines 26-32, 38 – Column 10, line 4) and teaches that voltage drop occurs during arc discharging (see Column 7, lines 36-52).

Hoeber does not disclose a voltage drop detection circuit for detecting the voltage drop in the solar array voltage provided by said solar array panels, said voltage drop detection circuit generating a voltage drop detection signal, and that the arc quenching means for generating an output signal which is applied as said control signal to the power dump stage so as to shunt said solar array voltage when a voltage drop is detected by said voltage drop detection circuit. This limitation, in combination with the other recited elements, is not disclosed by the Prior Art of record, and therefore, allowable. Claims 9-14 depend on Claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inouye et al. (US 4,232,070); Bingley et al. (US 5,289,998); Weinberg et al. (US 4,186,336); Barton et al. (US 4,832,755); Kurland et al. (US 4,755,231); Katz (US 6,177,629).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lucy Thomas whose telephone number is 571-272-
